

# Maths Wednesday 14.07.21

This week you are going to have some extra time to practise your maths assessments. Complete pages of questions and make sure you are checking using the inverse.

Enjoy 😊

$$409 + 100 =$$

A 10x5 grid is shown. A rectangle is drawn on the grid, starting from the 6th column and 3rd row from the left and bottom respectively, and extending to the 10th column and 5th row. The rectangle is 4 units wide and 2 units high.

$172 - 100 =$

A 10x10 grid is shown. A rectangle is drawn on the grid, spanning 4 units in width and 3 units in height. The rectangle is positioned such that its bottom-left corner is at the intersection of the 6th vertical line and the 4th horizontal line from the bottom. Its top-right corner is at the intersection of the 10th vertical line and the 7th horizontal line from the bottom.

$57 + 20 =$

A 10x5 grid is shown. A rectangle is drawn on the grid, spanning from the 6th column to the 10th column and from the 3rd row to the 5th row. The rectangle is 4 units wide and 2 units high.

A 10x5 grid is shown. A rectangle is drawn on the grid, spanning 4 units in width and 2 units in height. The rectangle is positioned such that its bottom-left corner is at the intersection of the 6th vertical line and the 3rd horizontal line from the bottom. The rectangle is outlined in black.

A 10x5 grid with a rectangle spanning 4 columns and 2 rows. The rectangle is located in the bottom-right area of the grid, starting from the 7th column and 3rd row, and ending at the 10th column and 5th row.

[illegible]

$398 + 429 =$

A 10x5 grid is shown. A rectangle is drawn on the grid, starting from the 6th column and 3rd row, extending to the 10th column and 6th row. The rectangle is 4 units wide and 3 units high.

$828 - 377 =$

A 10x6 grid is shown. A rectangle is drawn on the grid, starting from the 6th column and 4th row, extending to the 10th column and 6th row. The rectangle is 4 units wide and 2 units high.

$7 \times 8 =$

A 10x6 grid is shown. A rectangle is drawn on the grid, spanning from the 6th column to the 10th column and from the 3rd row to the 6th row. The rectangle is 4 units wide and 3 units high.

$27 \div 3 =$

A 10x5 grid is shown. A rectangle is drawn on the grid, spanning from the 7th column to the 11th column and from the 3rd row to the 5th row. The rectangle is 4 units wide and 2 units high.

$27 \times 4 =$

A 10x5 grid is shown. A rectangle is drawn on the grid, starting from the 6th column and 3rd row, extending to the 10th column and 5th row. The rectangle is 4 units wide and 2 units high.

$69 \times 8 =$

A 10x5 grid is shown. A rectangle is drawn on the grid, spanning from the 6th column to the 10th column and from the 3rd row to the 5th row. The rectangle is 4 units wide and 2 units high.
