

Year 1 Maths

Thursday 4.6.20

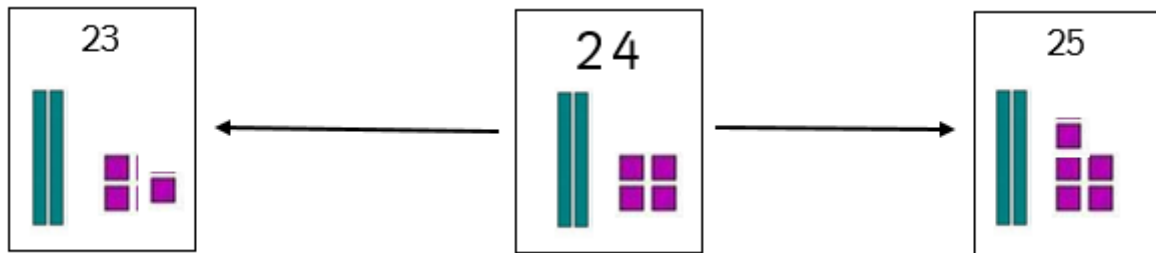

One More / One Less

Today we are going to practise finding one more and one less than a number.

Remember when we find **one more** – we are **adding** 1,

when we find **one less** we are **taking away** 1.

For example:

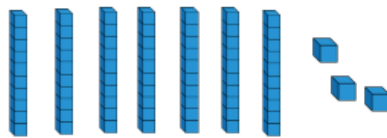

Ask a grown up to help you choose some numbers between 11 and 99.

Now complete the [find one more / one less sheet](#).

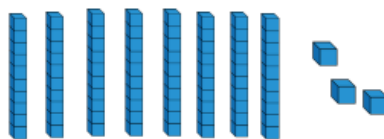

(Represent the numbers on the sheet by drawing them in tens and ones with either dienes, numicon or place value counters)

Challenge -

Dora started with this number.

I am going to find one more.

Has Dora shown the correct amount?
Explain how you know.
