# Your Maths activity today is to practise addition.

You will need a pack of playing cards

(You will need 2, 3, 4, 5, 6, 7, 8,9 and 10 in each suit)

- Choose two cards
- How many do they make altogether?
- Out of the two cards, which is the biggest number?
- Try adding the amounts together by counting on

For example, you have three and six.

Six is the biggest number.

Add three by counting on from

"6...   7,8,9"

EXTENSION
- Can you find two cards that add together to make six?
- Are there any other pairs that make six?
- Repeat with other numbers- try finding pairs that make ten!
