Your Maths activity today will be exploring 3D objects.

Last day today before half term! Well done everyone! You have all been amazing and the support you have given your children with their learning has been fantastic!

I think everyone should go on a long walk and talk about the shapes that you see on your journey. You could talk about houses being cubes. Bins

Keywords:

Points/edges/faces/
Curves/vertices

are cylinders. Any balls are spheres. You can talk about 2D shapes as well such as circles, triangles, square and rectangles.

Most of all have fun – you earned it!

If you have completed the activity, [click here](#)

Maths gym

Go around your home and find **10 objects that are 2D.**
